GENERAL CARE AND CLEANING

- Under normal conditions leather needs little care and attention. Regular dusting with a soft clean cloth or vacuum using a soft brush attachment removes dirt that is abrasive, speeding up normal wear.
- Spills such as liquids, grease, butter etc should be dealt with immediately by dabbing with a dry cloth or paper napkin. Further treatment is not advised.
- Never use cleaners as this can destroy the leather.
- Do not put hot cups (tea, coffee etc.) onto the leather.
- Protect from sustained direct sunlight and do not expose to excessive heat.
- Protect from sharp objects such as shoe buckles.
- If in doubt please consult a leather cleaning specialist.

COLOUR VARIATIONS

As leather is a natural product no two hides are identical and some variation in shade and texture is to be expected. Colours presented in this swatch should be used as a guide only.
